

Women in Struggle in Pakistan: WIS

WIS is based in village life in Pakistan. WIS promotes and supports education and training for women; the group also empowers women through income generating projects – fruit tree planting, sewing workshops, gardening, goats and literacy programs.

WIS also operates village schools for children of the poorest people in villages.

Over the years WIS has provided flood and emergency relief of food, clean water and school supplies for victims of natural disasters.

BBCF has supported WIS for more than 10 years; most recently thanks to a generous donor BBCF funded a building in Francisabad which is used as a school and a women's centre.

These photos show children and adults helping construct the new building; a schoolgirl on a sewing machine; distribution of orange trees to village women.

Donations for WIS may be sent to BBCF and will be forwarded

promptly.
